Farm machinery reflection

Think about your new design and answer the following questions.

What is your piece of machinery?
What design changes you have made?
and a gray
Why you have made the design changes.
What are some statistics on farming injuries and fatalities?
Why your new machine is better and safer compared to the original.
The second secon
How your new design keeps farmers safe and are there any benefits to the environment using your machine?

Farm machinery reflection plan

Title			
Introduction: Background information about	your piece of farming equipment and some		
statistics on farming injuries.	your place of farming equipment and seme		
old lotted on raming injurios.			
Change made to machine design:	How/why it has improved the safety and/or performance of the machine for farmers:		
Change made to machine decision	Howbyhy it has improved the sefety		
Change made to machine design:	How/why it has improved the safety and/or performance of the machine for farmers:		
Change made to machine design:	How/why it has improved the safety and/or performance of the machine for farmers:		
Conclusion: How have your design changes made your piece of farm equipment a better option for farm workers and the environment?			

Draft justification

Write your draft justification for your design changes here. Edit your draft on this piece of paper before publishing the final copy of your justification.
